As a subscriber to XM Radio, I have been enjoying their programming for over a year. Since I live in a very rural area and have to travel quite far to get from one place to another quite frequently, I've been utilizing their traffic and weather channels to keep my two children and I safe. There is NO reason why I should NOT be allowed to access those xm stations that I pay for, nor is there any reason why local programming should feel threatened...xm is offering a valuable service that I PAY for, there are many other radio listeners who ARE listening to them, do not take MY choice away from me!
